

This 2011 Gulfstream Independence 8360 is a great example of a high end front engine American RV. Based on the renowned Cummings 5.9 diesel front engine. The thing that makes this Independence so unique is the '3 zone living' floor plan which is exactly that, 3 zones.

Zone 1 has a private lounge area as soon as you walk in the RV with opposing leather sofas in addition to the driver and passenger swivelling chairs with a large TV.

Zone 2 is as you walk through the RV into the kitchen dining area where there is a fully appointed kitchen with Corian worktops opposite a freestanding table and chairs.

This is also complimented with full length windows and an additional TV.

Zone 3 is located to the rear of the RV with a large walk around bed and an abundance of storage. There is also a large private Jack and Jill bathroom with access from The bedroom or the dining/kitchen area. Options include beautiful full body paint, 2 awnings and satellite TV Satellite navigation system. Washing/ drying machine.

22,000 miles only
